Dear Patients,

It has been my honor to provide gastroenterology care to our community for the past 34 years. I have had the privilege of meeting many wonderful people in my practice and developing friendships over these years. I am writing to let you know that as of June 30, 2017, I will be retiring and my partners will be taking over the care of my practice. I am confident that my partners will continue to provide compassionate and quality medical care. As you know our doctors are some of the most knowledgeable and caring physicians in the state.

Please know that all of your medical records are confidential and safely on file here at Wilmington Gastroenterology. If you decide seek medical care outside of our practice, then you can follow the traditional routes to have your records transferred by contacting our office.
